SURFACE ENGINEERING, SURFACE INSTRUMENTATION & VACUUM TECHNOLOGY

**The international journal and abstracting service for vacuum science and technology and their application in research and industry**

**Contributors**
Manuscripts should be submitted in duplicate to either an Editor or an Assistant Editor at the addresses given below. Details of style are on the inside cover

**EDITORS**

T L Barr, *College of Engineering and Applied Science, University of Wisconsin-Milwaukee, Milwaukee, WI 53201, USA (Tel: (414) 229 4085, Fax: (414) 229 6958)*

L Holland, *Hazelwood, Balcombe Road, Pound Hill, Crawley, West Sussex RH10 3NZ, UK (Tel: 0293 882258, Fax: 0293 887265)*

L G Hultman, *Thin Film Division, Department of Physics, Linköping University, S-581 83 Linköping, Sweden (Tel: (46) 13 281284, Fax: (46) 13 137568)*

**Assistant Editor (Vacuum Technology)**
R Dobrozemsky, *Austrian Research Centre, A-2444 Seibersdorf, Austria*

(Address for all manuscripts on pumping, sealing, monitoring, kinetic theory, drying, metallurgy and chemical engineering)

**Assistant Editor (Ion Implantation)**
J A Van den Berg, *Electronic & Electrical Engineering, University of Salford, Salford M5 4WT, UK*

(Address for all manuscripts on the various aspects of ion implantation, machines, ion sources, vacuum chambers, interaction of energetic ions/electrons with surfaces, sorption, desorption, chemical, mechanical and electrical effects of implantation)

**Assistant Editor (Surface Science Instrumentation)**
J M Walls, *Department of Physics, Loughborough University of Technology, Loughborough, Leicestershire LE11 3TU, UK*

(Address for all manuscripts on surface science instrumentation for analysis including quadrupole analysers, mass and energy analysers, SIMS, ESCA, photon emission, Auger techniques, low energy ion scattering, SEM)

**Australasian Editor**
J L Robins, *Department of Physics, The University of Western Australia, Nedlands, W Australia 6009*

(Address for all manuscripts from authors based in Australasia)

**Eastern Editor**
T Okano, *Institute of Industrial Science, University of Tokyo, 7-22-1 Roppongi, Minato-ku, Tokyo 106, Japan*

(Address for all manuscripts from authors based in the Far East)

**Book Review Editor**
Mr W Steckelmacher, *177 Rusper Road, Ifield, Crawley, Sussex RH11 0HT, UK*

**Abstracts & Vacuum Products Survey Editor**
H Kheyrandish, *Electronic & Electrical Engineering, University of Salford, Salford M5 4WT, UK*

It is a condition of publication that manuscripts submitted to this journal have not been published and will not be simultaneously submitted or published elsewhere. By submitting a manuscript, the authors agree that the copyright for their article is transferred to the publisher if and when the article is accepted for publication. However, assignment of copyright is not required from authors who work for organizations which do not permit such assignment. The copyright covers the exclusive rights to reproduce and distribute the article, including reprints, photographic reproductions, microform or any other reproductions of similar nature and translations. No part of this publication may be reproduced, stored in a retrieval system or transmitted in any form or by any means, electronic, electrostatic, magnetic tape, mechanical photocopying, recording or otherwise, without permission in writing from the copyright holder.

**US Copyright Law Applicable to Users in the USA**
*Photocopying information for users in the USA:* The Item-Fee Code for this publication indicates that authorization to photocopy items for internal or personal use is granted by the copyright holder for libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service provided the stated fee for copying beyond that permitted by Section 107 or 108 of the United States Copyright Law is paid. The appropriate remittance of $7.00 per page is paid directly to the Copyright Clearance Center Inc., 222 Rosewood Drive, Danvers, MA 01923, USA.

*Permission for other use:* The copyright owner's consent does not extend to copying for general distribution, for promotion, for creating new works, or for resale. Specific written permission must be obtained from the publisher for such copying.

*The Item-Fee Code for this publication is:* 0042-207X/94 $7.00+.00

**Subscription Rates**
**Volume 46 (Published Monthly)**
Annual Institutional Subscription Rates 1995: North, Central and South America US$924.00, Rest of World £620.00. Associated Personal Subscription Rates are available on request for those whose institutions are library subscribers. Sterling prices exclude VAT. Non-VAT registered customers in the European Community will be charged the appropriate VAT in addition to the price listed. Prices include postage and insurance and are subject to change without notice.

Subscription enquiries from customers in North America should be sent to: Elsevier Science Inc, 660 White Plains Road, Tarrytown, NY 10591-5153, USA, and for the remainder of the world to: Elsevier Science Ltd, The Boulevard, Langford Lane, Kidlington, Oxford OX5 1GB, UK.

Back issues of all previously published volumes, in both hard copy and on microform, are available direct from Elsevier Science offices (Oxford, New York).

Second Class Postage paid at Newark, NJ. Postmaster send address corrections to Vacuum, Elsevier Science Inc, 660 White Plains Road, Tarrytown, NY 10591-5153, USA.

*Typeset in Great Britain by BPC Digital Data Ltd.*
*Printed by BPC-AUP Aberdeen Ltd.*

## number 1

| AUTHORS | | ARTICLES |
|---|---|---|
| **B Pécz and A Barna** | 1 | Reactive ion milling—thinning of compound semiconductors |
| **A Peled, J Farhadyan, Y Zloof and V Baranauskas** | 5 | The midrange and high temperature dependence of vacuum deposited NiCr thin film resistors |
| **A J Perry, V Valvoda and D Rafaja** | 11 | On the residual stress and picostructure of titanium nitride films—II. A picostructural model |
| **O M N D Teodoro, M J P Maneira and A M C Moutinho** | 15 | Energy analysis in positive SIMS with $Cs^+$ beams |
| **Li-Jian Meng, M Andritschky and M P dos Santos** | 19 | Zinc oxide films prepared by dc reactive magnetron sputtering at different substrate temperatures |
| **X G Wang and B Q Chen** | 23 | Titanium nitride sputter deposition on to dies using twin ion beams for dynamic material mixing |
| **A V Tulubensky** | 29 | Vacuum distribution calculations in vacuum systems of any complexity |
| **R A Yankov, R V Gribkovskii and F F Komarov** | 37 | Rutherford backscattering and channelling studies of buried nitride structures directly produced by high intensity ion implantation of nitrogen into silicon |
| **S Anjali, S V Gogawale and D Ramanathan** | 41 | Study of the parametric variation for argon glow discharge conditioning of SS304 |
| **M Kuvakin, V Yurasova and H Motaweh** | 45 | Surface relaxation of nickel single crystal near the Curie temperature |
| **R A Alimov, Sh A Alimov, V Ya Kanarov and V I Matveev** | 49 | On the theory of the formation of the final charge state of Ar and Ne atoms scattered by surfaces of Ag and Pd polycrystals |
| **S Lugomer and M Stubičar** | 53 | Laser-induced Rayleigh–Taylor instability frozen in a tungsten surface-breakdown pattern |
| **M M Michaelis and A Forbes** | 57 | Vacuum vessels in tension |
| **N I Donkov** | 61 | Electron beam evaporation with hot filament and magnetic field—computer control and parameter estimation |
| **M K El-Adawi, M A Abd El-Naby and S A Shalaby** | 65 | Laser heating of a slab having temperature dependent surface absorptance |
| **G Carter, M J Nobes, C Cave and N Al-Qadi** | 71 | Ripple production induced by oblique incidence ion bombardment of Si |
| **H Bialas and K Heneka** | 79 | Epitaxy of fcc metals on dielectric substrates |
| **P-Y Jouan and G Lemperiere** | 89 | Study of a rf planar magnetron sputtering discharge: discharge characteristics and plasma diagnostics |
| **M S Al-Robaee, G N Subbanna, K N Rao and S Mohan** | 97 | Studies of the optical and structural properties of ion-assisted deposited $Al_2O_3$ thin films |
| **Y Takahashi, K Inoue, Y Tsunematsu, K Nishiguchi and K Takahashi** | 103 | Interfacial reaction of Ag/Ti thin films on a silica substrate |
| **I I Khandaker, E Glavas, K Morse, S Moruzzi and G R Jones** | 109 | Chromatic modulation as an on-line plasma monitoring technique |
| **A A Hussain and M Sayer** | 115 | A sputter-etching target and rotational carousel for multilayer films |

| | | |
|---|---|---|
| **A A Hussain, M Sayer, R J C McLean, D J Hughes and T J N Smith** | **121** | Surface texturing of multilayer Ag/Cu films by sputter-etching |
| **I Suzuki** | **127** | Determination of the nonlinear response of pressure gauges |
| **Y Suetsugu** | **133** | Conditioning of a distributed ion pump |
| **P Norberg, L-G Petersson and I Lundström** | **139** | Characterization of gas transport through micromachined submicron channels in silicon |
| **Huai-wu Zhang, You-gang Zhang and Wu-yi Xu** | **145** | The effects of substrate bias and reactive gas partial pressure on the resistivity of sputtered ITO films |
| REPORT<br>**G G Lister** | **149** | Plasma and Ion Surface Engineering—PISE |

## numbers 2/3

Proceedings of the 16th International Seminar on Surface Physics
5–10 October 1992, Kudowa, Poland

| AUTHORS | | ARTICLES |
|---|---|---|
| **M Stęślicka and S Mróz** | **165** | Preface |
| **B Adamowicz** | **167** | Dependence of silicon surface electronic parameters on surface Fermi level position |
| **B Bieg and S Kuźmiński** | **171** | Influence of gallium doping on surface properties of $Cd_{0.99}Mn_{0.01}Te$ |
| **E V Chulkov, A V Nikiforov and A G Lipnitskii** | **175** | Surface electronic structure of $Ni_3Al(001)$ |
| **J J Czyżewski, S Klein and J Krajniak** | **179** | Investigations of the band transitions in ruthenium (0001) |
| **W Jaskólski** | **183** | Multiband approach to surface resonances |
| **L Jurczyszyn and M Stęślicka** | **187** | The influence of the crystal potential on the field-induced electronic states—I. Resonance states |
| **L Jurczyszyn and M Stęślicka** | **191** | The influence of the crystal potential on the field-induced electronic states—II. Localized states |
| **S Kuźmiński, K Pater and A T Szaynok** | **195** | Electro-optical properties of a $Cd_{1-x}Fe_xTe$ surface layer |
| **B A Orłowski, B J Kowalski, J Bonnet, C Hricovini and R Pinchaux** | **199** | Dangling bond states on HgSe(110) surface |
| **T Radoń and S Jaskółka** | **203** | Photofield emission from the surface states of the tungsten (112) plane |
| **B Stankiewicz and P Modrak** | **205** | Electronic structure of $CaF_2$—LCAO calculations for slabs with the (111) free surface |

| | | |
|---|---|---|
| **B Stankiewicz and W Kisiel** | 209 | Influence of fluorine desorption on electronic structure of $CaF_2$—LCAO slab calculations |
| **M Stęślicka and R Kucharczyk** | 211 | Effective-mass superlattice—density-of-states studies |
| **J Szuber and M Piwowarczyk** | 215 | Electronic properties of the space charge layer of the clean $SnO_2$(110) surface |
| **S I Baranchuk and N V Mileshkina** | 219 | A negative photoresponse of InSb field emission |
| **R Błaszczyszyn and Ch Kleint** | 223 | Negative FEFN cross-correlation functions of the W(110)K adsorption system—position, temperature and coverage dependence |
| **M Błaszczyszynowa and R Błaszczyszyn** | 229 | Diffusion of large potassium deposit on sulfur-precovered nickel field emitter |
| **M S Mousa** | 235 | A study of the effect of hydrogen plasma on microfabricated field-emitter arrays |
| **M S Mousa** | 241 | Investigations of *in situ* carbon coating on field-emitter arrays |
| **M S Mousa** | 245 | Observations of a field-forming process for ZnO–W cold cathodes |
| **M S Mousa, A Karpowicz and S Surma** | 249 | 'Switch-on' phenomena in field-electron and field-ion microscopy |
| **W A Schmidt and N Ernst** | 255 | On the binding strength of surface metal atoms in a high electric field—face-specific appearance energy measurements of field evaporated rhodium ions |
| **Yu Suchorski, W A Schmidt, J H Block and H J Kreuzer** | 259 | Comparative studies on field ionization at surface sites of Rh, Ag and Au—differences in local electric field enhancement |
| **Z Szczudło, K Sendecka, W Gubernator and A Ciszewski** | 263 | Adsorption and nucleation of hafnium on facets and stepped surface areas of tungsten |
| **W Arabczyk, U Narkiewicz and K Kałucki** | 267 | Model of active surface of iron catalyst for ammonia synthesis |
| **M Berdau, M Ehsasi, A Karpowicz, W Engel, K Christmann and J H Block** | 271 | Spatial self-organization during catalytic reaction of CO and oxygen on a Pd(110) surface |
| **S Hawker, C Mukoid, J P Baydal and R M Lambert** | 275 | Catalysis in ultra-high vacuum—oxidative dehydrogenation of cycloalkenes on Ag(111) |
| **E Dobierzewska-Mozrzymas, P Biegański and E Pieciul** | 279 | Optical properties of discontinuous copper films on dielectric substrates—a renormalization approach |
| **G Gładyszewski, J Pacaud, Ph Goudeau, C Jaouen, A Naudon and J Grilhé** | 285 | Interface of the Cu–W multilayers |
| **L Gładyszewski** | 289 | Ionization degree for alkali atoms on a rhenium surface |
| **M W Radny and P V Smith** | 293 | Chemisorption of fluorine on the silicon(001)2x1 surface |
| **J M Rogowska** | 297 | The chains of adatoms as a result of oscillatory interactions |
| **L Stobiński and R Duś** | 299 | Model of atomic hydrogen adsorption on thin gold film surface |
| **M Stróżak, Z Mitura, M Jałochowski and M Subotowicz** | 303 | RHEED intensity oscillations during the growth of Pb–In films on Si(111) with modified surface |
| **E Taranko, R Taranko, R Cardenas and V K Fedyanin** | 307 | Chemisorption at finite coverages—the coherent potential approximation vs the equation of motion for Green's functions method |
| **G Gergely** | 311 | Commemoration of the 25th anniversary of Auger electron spectroscopy |
| **A Dittmar-Wituski, M Naparty and J Skonieczny** | 315 | A proposal for an electron energy spectrometer based on two simulated hemispherical analysers in tandem for TCS, EELS and SEE |

| | | |
|---|---|---|
| **G Gergely** | **317** | Conversion of peak/background data for AES and coincidence spectroscopy |
| **A Grzeszczak and S Kaszczyszyn** | **321** | Energetic dependence of the surface-independent peak in the electron spectrum |
| **S Kaszczyszyn and A Grzeszczak** | **323** | Application of the channel electron multiplier to the unipole mass spectrometer |
| **A Sulyok, G Gergely, B Gruzza and L Bideux** | **325** | Some problems of electron spectroscopy (AES, EPES) using a retarding field analyser |
| **A Akjouj, B Djafari-Rouhani and L Dobrzynski** | **329** | Surface magnons in magnetic superlattices |
| **Á Barna, A Konkol, A Sulyok and M Menyhárd** | **333** | Experimental study of low energy ion mixing |
| **P Bondot, A Porte, B Gruzza, L Bideux and S Mróz** | **337** | The Monte Carlo method applied to the electrons elastically reflected by a copper sample |
| **B Djafari-Rouhani, E H El Boudouti and E M Khourdifi** | **341** | Localized and resonant acoustic modes in semi-infinite superlattices |
| **W Karaś** | **345** | Hyperfine interactions in bcc (110) iron coated with ruthenium |
| **J Rauluszkiewicz, M Wiszniewski, S Szuba, A Reich and J Fink-Finowicki** | **347** | STM characteristics of BiSrCaCuO single crystals in normal and superconducting states |
| **J Kołodziej, P Czuba, P Piątkowski, Z Postawa, V Kempter and M Szymoński** | **353** | Thermally assisted desorption processes in electron bombarded alkali halides |
| **S Mróz** | **357** | Growth and properties of ultrathin silver layers on the Cu(111) face—the influence of the substrate temperature |
| **M K Naparty and J Skonieczny** | **361** | Investigations of thin Ag and Cu layers epitaxially grown on Cu(111) and Ag(111) by means of TCS, AES and $\Delta\Phi$ |
| AUTHOR INDEX | **367** | |

|---|---|---|
| | | Analysis by a Combination of Ion-beam (accelerator based) and Surface Specific Techniques (IB-SA93)<br>5–7 April 1993, Namur, Belgium |
| | **371** | Publisher's note |
| AUTHORS | | ARTICLES |
| **P Coad** | **373** | Introduction—Analysis by a combination of ion-beam (accelerator based) and surface specific techniques (IB-SA93) |
| **G G Ross** | **375** | Analysis of hydrogen isotopes in materials by secondary ion mass spectrometry and nuclear microanalysis |
| **W De Coster, B Brijs, H Bender, J Alay and W Vandervorst** | **389** | RBS, AES and XPS analysis of ion beam induced nitridation of Si and SiGe alloys |

| | | |
|---|---|---|
| **J P F Sellschop, S H Connell, C C P Madiba, E Sideras-Haddad, S Kalbitzer, S Jans, P Oberschactsiek, K Bharuth-Ram, J Schneider and R Kiefl** | 397 | The nature of the state of hydrogen on the surface and in the bulk of natural and synthetic diamond (using ion beam techniques) |
| **T Petit, A Chevarier, N Chevarier, L Deshayes, M Charbonnier and M Romand** | 403 | Energetic ion scattering analysis and glow discharge optical spectrometry characterization of amorphous hydrogenated carbon films elaborated by PACVD |
| **L Houssiau and P Bertrand** | 409 | Surface structure analysis by time-of-flight ISS: influence of primary ion nature and energy for scattering on Cu(110) |
| **P Maugis and Y Serruys** | 413 | Al–Ti reactive interdiffusion studied by STIMS and RBS |
| **L Popa-Simil, A Ivan, M Dumitru, E Ivanov, C Gornic, C Benea and V Dima** | 419 | Machining influence on the surface of some roughness samples |
| **S Tobbeche, C Benazzouz, N Boussaa, M Zilabdi, A Benouatas, A Bouabellou and R Halimi** | 421 | Formation of $CrSi_2$ studied by Rutherford backscattering spectrometry |
| **M Rubel, R Haasch, P Mrozek, A Wieckowski, C De Pauli and S Trasatti** | 423 | Characterization of $IrO_2$–$SnO_2$ thin layers by electron and ion spectroscopies |
| **M Rubel, B Emmoth, P Wienhold, N Almqvist and C H Wu** | 429 | Deuterium interaction with silicon–graphite materials exposed to the tokamak plasma |
| **J P Coad and B Farmery** | 435 | Redeposition effects on the target plates of the JET tokamak |
| **F C Stedile, F L Freire Jr, W H Schreiner and I J R Baumvol** | 441 | Characterization of titanium–aluminum nitride thin films by ion beam techniques and X-ray diffraction |
| **H Wang and P Van Espen** | 447 | Resolution enhancement of secondary ion microprobe images using Fourier deconvolution |
| **D Ila, G M Jenkins, L R Holland, L Evelyn and H Jena** | 451 | A study of the thermally induced carbonization of phenolformaldehyde by combined ion beam and surface specific analyses |
| | 455 | Author Index |
| REGULAR PAPERS | | |
| **N A Hegab, M Fadel and K Sedeek** | 459 | Memory switching phenomena in thin films of chalcogenide semiconductors |
| **S Lugomer and M Stipančić** | 463 | Nucleation and growth of Ta oxide in nonstationary thermal field—III. Self-organized structures controlled by convection |
| **C D Tsiogas and J N Avaritsiotis** | 473 | Simulation of reactive sputtering from a concentric dual-source magnetron in roll-to-roll coating processes |
| **A B Maity, D Bhattacharyya, S Chaudhuri and A K Pal** | 483 | Inhomogeneity in semiconductor films: an analysis from optical studies |
| LETTER TO THE EDITOR | 487 | |

| ANNOUNCEMENTS | 495 | |

## number 5

Papers presented at the
VACUUM, PLASMA AND SURFACE TECHNOLOGY CONFERENCE
19–22 April 1993, Brighton, UK

| AUTHORS | | ARTICLES |
|---|---|---|
| **R Keith Fitch** | 497 | Introduction |
| **M G Jubber, J I B Wilson, I C Drummond, P John and D K Milne** | 499 | Design of a UHV reactor for microwave plasma deposition of diamond films |

| | | |
|---|---|---|
| **P J Kelly and S F Tinston** | **507** | Pyrotechnic devices by unbalanced magnetron sputtering |
| **M Garven, A D R Phelps, S N Spark, D F Howell and N Cade** | **513** | Field emission array experiments relevant to cold cathode gyrotrons |
| **R Jackson, A J Pidduck and M A Green** | **519** | Removal of surface contamination after reactive ion etching of silicon dioxide |
| **G G Lister** | **525** | Plasma modelling for surface processing |
| **A Chew and D E Sykes** | **535** | Sample rotation during SIMS depth profiling in a Cameca IMS3F |
| **G Carter and M J Nobes** | **539** | Probabilistic and deterministic approaches to surface contour evolution during sputtering |
| **D Burghardt, A Mack, D Perinic, H Reichert and D Röhrig** | **547** | Investigation of nitrogen and helium cryosorption on molecular sieves |
| **I Özdemir and D Perinic** | **551** | Testing of elastomer-sealed, dust-contaminated vacuum valves |
| **A J Lamm and M Carrasco** | **555** | Hydrofluorocarbon plasma submicron silicon dioxide etch in an axisymmetric static magnetron |
| **H Mościcka-Grzesiak and Z Banaszak** | **561** | Changes of electroinsulating surface properties of ceramic insulators caused by vacuum deposition of copper |
| **K Siodla and W Ziomek** | **565** | Electric strength of vacuum gap under various voltage conditions |
| **A Hammiche, R P Webb and I H Wilson** | **569** | A scanning tunnelling microscopy study of thin gold films evaporated on silicon |
| **A Hammiche, R P Webb and I H Wilson** | **575** | A novel combined scanning tunnelling/scanning force microscope |
| **B I Medeuov, D K Daukeev and R P Webb** | **579** | Oxygen atom interaction with radiation defects in Nb irradiated by He ions |
| **B I Medeuov, D K Daukeev, I R Chakarov and R P Webb** | **583** | Investigation of oxygen ion implantation in niobium by internal friction technique and computer simulation |
| | **587** | Author Index |
| REGULAR PAPERS | | |
| **Z Wronski, J L Sullivan and S O Saied** | **591** | Energy spectra of heavy particles bombarding the cathode surface in a dc glow discharge and its effects on low energy implantation |
| **Yu Wei, J L Sullivan and S O Saied** | **597** | A study of contaminant overlayer on Ge(100) surface using kinetic resolved XPS |
| **P Hovsepian and D Popov** | **603** | Cathode poisoning during reactive arc evaporation of titanium in nitrogen atmosphere |
| **V Smolar** | **609** | Backscattering and transmission for normal incidence of electrons in the small-angle and transport approximation |
| **B Erjavec** | **617** | Alkali vapour pressure variations during $Na_2KSb(Cs)$ photocathode synthesis |
| **M Wautelet, M Hecq, J P Dauchot, M F Dony and P B Legrand** | **623** | On the optical emission of inhomogeneous sputtering discharges |
| LETTER TO THE EDITOR | **627** | |
| VACUUM NEWS | **629** | |
| VACUUM DIARY | **645** | |

Proceedings of the
1st EUROPEAN TOPICAL CONFERENCE ON HARD COATINGS and
the II IBERIAN VACUUM MEETING
12–15 July 1993, Alicante, Spain

| AUTHORS | | ARTICLES |
|---|---|---|
| **J L de Segovia and M F Laranjeira** | **993** | Foreword |
| **J I Onate and J S Colligon** | **995** | Round table discussion: problems to be solved in the field of hard coatings |
| **H Freller** | **997** | Vapour-phase coating processes for hard coatings |
| **F Arrando, R M Rodriguez, M C Polo and J Esteve** | **1001** | Microstructural analysis of CAPD Ti(C,N) hard coatings |
| **E Huber and S Hofmann** | **1003** | High temperature oxidation of (Ti,Pd)N and (Cr,Pd)N coatings studied with AES and XPS sputter depth profiling |
| **E Román, J L de Segovia and R Rodriguez** | **1007** | Mechanical properties of steels implanted with $N_2^+$ |
| **S Watanabe, S Miyake and M Murakawa** | **1009** | Deposition technique and tribological properties of cubic BN |
| **M C Polo, J Cifre and J Esteve** | **1013** | Boron incorporation effects in CVD diamond film growth |
| **O Sanchez, M M Garcia, L Vazquez and C Gomez-Aleixandre** | **1015** | Influence of oxygen on the deposition of diamond coatings by microwave plasma CVD |
| **M Mozetič, A Zalar, M Kveder and M Drobnič** | **1017** | On the plasma deposition of diamond films |
| **H A Jehn, B Rother and H Kappl** | **1019** | Homogeneity of PVD hard coatings deposited on 3D parts |
| **M J Hernandez, F J Gomez, J Garrido, J Piqueras and C Gomez-Aleixandre** | **1023** | Electron cyclotron resonance plasma deposition as a promising technique for low temperature hard coatings |
| **S García, J M Martín, I Mártil and G González-Díaz** | **1027** | Optical characterization of silicon nitride films deposited by ECR-CVD |
| **A Essafti, C Gomez-Aleixandre and J M Albella** | **1029** | Study of boron nitride deposition process from diborane and ammonia gas mixtures |
| **A S Korhonen** | **1031** | Corrosion of thin hard PVD coatings |
| **J Pou, P González, E García, D Fernández, J Serra, B León, S R J Saunders and M Pérez-Amor** | **1035** | High temperature corrosion-resistant ceramic coatings obtained by laser chemical vapour deposition |
| **J F Trigo, E Elizalde, C Quirós and J M Sanz** | **1039** | Characterization of Zr thin films grown by dual ion-beam sputtering |
| **D Leinen, A Fernández, J P Espinós and A R González-Elipe** | **1043** | Preparation of $TiO_2$ and $Al_2O_3$ thin films by ion-beam induced chemical vapour deposition |
| **M Andritschky and V Teixeira** | **1047** | Residual stress in protective $ZrO_2$ coatings produced by magnetron sputtering |
| **J Castanho, A Cavaleiro and M T Vieira** | **1051** | Study of tungsten sputtered films with low nitrogen content |
| **R N Peacock and N T Peacock** | **1055** | Plots of gauge constant vs pressure for analyzing cold-cathode gauge calibration data |
| **F L Tabarés, A García and J Botija** | **1059** | The vacuum system of the TJ-II stellarator |
| **C A F Varandas** | **1063** | Vacuum technology on fusion devices |
| **L M Sáiz and A Fernández** | **1067** | Vacuum and its applications in the manufacture of special steels |

| | | |
|---|---|---|
| **J Ruiz and M Elices** | **1069** | Fatigue crack growth in high vacuum and gaseous atmospheres in an aluminium alloy |
| **C L Greenwood and E M Williams** | **1073** | Structure determinations at interfaces and oxide surfaces using ESDIAD |
| **I Colera and J L de Segovia** | **1077** | Influence of electron interaction on the chemisorption of CO on Nb(110) |
| **M C Torquemada, E Román and J L de Segovia** | **1081** | Characterization of $YBa_2Cu_3O_{7-x}$ by electron-stimulated desorption |
| **G Lassaletta, A Caballero, S Wu, A R González-Elipe and A Fernández** | **1085** | Photoelectron spectroscopy of metal oxide particles: size and support effects |
| **J M Palacios, L Daza, J Baranda, J Soria, J L G Fierro and T González** | **1087** | Characterization of Ni cathodes used in molten carbonate fuel cells |
| **A Arranz and C Palacio** | **1091** | AES and factor analysis study of the interaction of oxygen with tantalum and tantalum nitride thin films |
| **M Mozetič, M Kveder, M Drobnič, A Paulin and A Zalar** | **1095** | Determination of atomic hydrogen density with catalytic probes |
| **N Filipe, A Cavaleiro and M T Vieira** | **1099** | Influence of the target/shield distance on the coatings deposition by rf magnetron sputtering |
| **J Muñoz and C Domínguez** | **1101** | $N_2O$ plasma etching of polyimides |
| **A García-Alonso, E Castaño, I Obieta, J García and F J Gracia** | **1103** | Thin film technology applied to the development of a multilayer pressure sensor device |
| **R Martins and I Ferreira** | **1107** | Engineering of the energy coupling in PECVD systems used to produce large area a-Si:H coatings |
| **M Vieira, E Fortunato, C N Carvalho, G Lavareda and R Martins** | **1109** | Influence of photodegradation on the $\mu\tau$ and microstructure of pin a-Si:H devices |
| **J M Villalvilla, C Santos and J A Vallés-Abarca** | **1113** | Bombardment angle dependence of reactive ion-beam etching of GaAs with $CH_4/H_2$ |
| **J Costa, G Sardin, J Campmany and E Bertran** | **1115** | Preparation of nanoscale amorphous silicon based powder in a square-wave-modulated rf plasma reactor |
| **V Madigou, S Veintemillas, R Rodriguez-Clemente, A Figueras, C Combescure and B Armas** | **1119** | Preferred orientation of SiC coatings obtained by MOCVD and its correlations with the pyrolysis byproducts of $Si(CH_3)_4$ |
| **J M Blanco, J J Serrano, F J Jiménez-Leube, T Rodríguez and H Wolters** | **1121** | Determination of iridium silicides using matrix effects in SIMS |
| **M J Caturla, I Abril and J J Jiménez-Rodríguez** | **1123** | Depth profiling of isotopic markers |
| **A Rodríguez, I Esquivias and T Rodríguez** | **1125** | Solid phase epitaxy of $Ge_xSi_{1-x}$ films deposited on Si substrates |
| **F Sánchez, X Queralt, C Ferrater, R Aguiar and M Varela** | **1129** | Deposition of $Er_2O_3$ thin films on Si(100) by laser ablation |
| **F Sánchez, C Ferrater, R Aguiar and M Varela** | **1131** | Study of the interdiffisuion of ceramic thin films deposited on Si(100) by laser ablation |
| **J C Moreno-Marín, I Abril, A Gras-Martí, V Konoplev, J J Jiménez-Rodríguez and A M C Pérez-Martín** | **1135** | Energy spectra of reflected and sputtered particles in magnetron deposition systems |
| **R G Barral, J V Fonseca, M I C Ferreira and J A Ferreira** | **1139** | Optical characterization of photoactive multilayers |
| **A Lousa, S Gimeno and J Martí** | **1143** | Preparation conditions of transparent and conductive $SnO_2$ thin films by reactive evaporation |
| **M Vieira, E Fortunato, G Lavareda, C N Carvalho and R Martins** | **1147** | Light and temperature effect on pin *a*-Si:H device performance |
